DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

2. Claim 1 is objected to because of the following informalities: In line 1: "Optical" should be changed -- An optical --. Appropriate correction is required.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, an encasement 51 for each of the plurality of optical fibers 52 must be shown or the feature(s) canceled from the claims 1014. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement

Art Unit: 2839

Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The following is a quotation of an appropriate paragraph of 37 CFR 1.75:

(d) The claim or claims must conform to the invention as set forth in the remainder of the specification and the terms and phrases used in the claims must find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description. (See 1.58(a)).

5. Specification is objected under 37 C.F.R. 1.75(d) because an encasement surrounding each of the plurality of fibers has not been described in the specification.

Claim Rejections - 35 USC § 112

6. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claims fail(s) to correspond in scope with that which applicant(s) regard as the invention can be found in the Figures 5-7reply filed with the application on 12/30/03. In that paper, applicant has shown a single encasement 51 for a plurality of fibers 52, and this statement indicates that the invention is different from what is defined in the claim(s).

Note: A single encasement for a plurality of fibers has been assumed.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2839

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1, 9 and 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Quinn et al. (6463199).

Quinn (Figures 1-6) shows an optical fiber cable 40 having a plurality of longitudinally extending optical fibers 16 spaced apart from one another and an encasement 20 made of void-free polymer (low density polyethylene) and essentially circular cross-section surrounding the plurality of optical fibers 16. There is an additional polymer layer 12.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 2-8, 10-11 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Quinn et al. (6463199).

Quinn shows all the features of these claims except material, size, shape of the various components of the cable. Selecting a material, size or shape is general knowledge. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to select a material and specific size and shape depending upon its suitability for the intended purpose because these involve only routine skill in the art.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bourget (20040213528).
